#EndAdolescentAIDS

Objectives of Country Assessments

To support countries in identifying equity and performance gaps limiting HIV prevention, treatment and care results in adolescents (aged 10 – 19) and define priority actions to accelerate and improve the quality of the national response to HIV among adolescents.

1

Assess national HIV programme response for adolescents focusing on who is most affected, where and what interventions are most critical

2

Analyze bottlenecks and gaps limiting effective coverage of priority HIV programme interventions

3

Define corrective actions to address bottlenecks, gaps in data and accelerate programme coverage, quality and impact
