2022 HIV Estimates

Note: Charts will be blank if estimates were not published in July 2022.

Cameroon

Early infant diagnosis (EID)

Percentage of infants born to pregnant women living with HIV who were tested for HIV within two months of birth (%), 2015-2021

Number of infants born to pregnant women living with HIV and number tested for HIV within two months of birth, 2015-2021

Antiretroviral therapy (ART) coverage for people living with HIV

ART Coverage (%) of children aged 0-14 and adults aged 15+, 2015-2021

Number of children aged 0-14 living with HIV and number receiving ART, 2015-2021

Number of adolescents aged 10-19 living with HIV by sex, 2015-2021

Prevention of mother-to-child transmission of HIV (PMTCT)

PMTCT Coverage (%) and mother-to-child HIV transmission rate (%), 2015-2021

Number of pregnant women living with HIV and number receiving ARVs, 2015-2021

Comparison of children on ART to pregnant women on ART
Paediatric ART coverage (%) and Maternal ART (PMTCT) coverage (%), 2015-2021

Stacked bar for maternal-to-child-transmission
Number of new HIV infections among children by source of infection, 2021

Cameroon

Number of people living with HIV

Population	2021	Percent contribution to all ages	Percent contribution to all children aged 0-19	Percent change since:		Breakdown by sex:				
				2000	2010	Female	%	Male	%	
By five-year age group	Age 0-4	11,000	2%	22%	-54%	-52%				
	Age 5-9	9,100	2%	18%	21%	-54%				
	Age 10-14	13,000	3%	25%	751%	0%				
	Age 15-19	18,000	4%	36%	-30%	-1%	12,000	62%	6,900	38%

2022 Laws and Policies

Cameroon

Pillar	Laws and Policies Questions/Indicators	Responses
1	TDF+3TC (or FTC) + DTG preferred first-line ARVs for treatment initiation in national guidelines for adults and adolescents	Yes
	TDF+3TC (or FTC) + DTG preferred first-line ARVs for treatment initiation in national guidelines for pregnant and/or breastfeeding women	Yes
	DTG recommended as preferred option for treatment initiation in children <20kg	No response
	DTG recommended second-line option for children ≥20kg	No response
2	Populations prioritized in viral load testing prioritization policy - Pregnant and breastfeeding women	No response
	Populations prioritized in viral load testing prioritization policy - Infants and children (0–<10 years)	No response
	Populations prioritized in viral load testing prioritization policy - Adolescents (10–19 years)	No response
3	Country has a policy on retesting HIV-negative women during pregnancy/delivery and/or the post-partum/breastfeeding period	Yes
4	Interventions targeting healthcare workers on human rights and gender-based violence	Yes, at scale
	Training programmes on HIV-related human rights and non-discrimination for: healthcare workers	Yes, at a small scale
	Laws requiring spousal consent for married women to access sexual and reproductive health services	No
	Laws requiring spousal consent for married women to access HIV testing	No
	Social protection strategy/policy/framework: Refers to HIV	Yes
	Social protection strategy/policy/framework: Recognizes people living with HIV as key beneficiaries	Yes
	Social protection strategy/policy/framework: Recognizes key populations as key beneficiaries	Yes
	Reporting requirements for CSOs/CBOs delivering HIV services are streamlined	Yes
	Routine data collection on HIV service delivery institutionalized in an information system	Yes including CHIS
	Treatment cascade data available and analysed: testing at the district level	Yes
	Patient monitoring system indicators and tools updated using 2017 WHO patient monitoring guidelines	Yes, partially

Pillar	Additional Indicators to be Completed by Countries	Responses
1	Children tested at 18 months of age for HIV status	
	Viral load suppression coverage for children 0-14	
	Viral load suppression coverage for adolescents 15-19	
2	Retention in care among pregnant women	
	Retention in care among breastfeeding women	
	Viral load suppression coverage among pregnant women	
	Viral load suppression coverage among breastfeeding women	
3	HIV retesting coverage among pregnant women	
	HIV retesting coverage among breastfeeding women	

Pillar Definitions:

- 1 Early testing and optimized treatment for infants, children, and adolescents living with HIV
- 2 Closing the treatment gap for pregnant/breastfeeding women living with HIV and improving continuity of treatment
- 3 Preventing new HIV infections among pregnant/breastfeeding adolescents and women.
- 4 Addressing rights, gender equality and the social and structural barriers to access services and promote participation
