Figure 3.
Percentage and number of new vertical HIV infections by cause of transmission, 2021

Highlighting from Global Alliance action plan:

- Strengthening of community interventions led by women living with HIV, promoting the link between HIV-positive pregnant women and exposed children with Health Units, through existing social projects in the country, such as the Kwenda Project and the Fight against Poverty; to close gaps in diagnosis, treatment.
- Reinforcement of the Information System, particularly the Community Information System.
- Operationalization of the National Commission for the Fight against AIDS and Major Endemic Diseases, with a view to strengthening multisectoral actions in the response to HIV-AIDS.
- Mobilization and Empowerment of Women living with HIV on Human Rights and gender equity, based on the results of the case study against Stigma and Discrimination.

"We reaffirm our commitment to ongoing global, regional and national efforts to achieve universal access and end AIDS in children by 2030."

— Her Excellency Ms Silvia Paula Valentim Lutucuta, Minister of Health
